IEG PI NOTICE

DISTRIBUTION:

All PI's

No. 18-77

TITLE/SIGNIFICANCE:

A new type of comsat station, designated Type D, has been identified at various radio communications transmitter stations in the Soviet Union. (S)

COMMENT: (S/WNINTEL/NFD) The Type D comsat station is similar in appearance to the Type C comsat station. The length of the building for the Type D is 8 meters shorter than that of the Type C and is a single story building unlike the Type C which is a two-story building. Both types have the antenna pedestals at the ends of the building and off center from the long axis. (For examples of Types A, B, and C Comsat Stations see IEG PI Notice 29-76)
